Table DF-2: Capital Adequacy

Qualitative disclosures	
(a) A summary discussion of the bank's approach to assess the adequacy of its capital to support current and future activities The bank carries out regular assessment of its capital requirement from time to time to maintain the capital to Risk Weight Assets Ratio (CRAR) at desired level. The capital plan is reviewed on annual basis to take care of business growth and CRAR. The bank has adopted standardized approach for credit risk, basic indicator approach for operational risk and standardized duration approach for market risk. The bank has put in place a well laid down Internal Capital Adequacy Assessment Process to enable the bank to plan its capital requirements in relation to its business projections and to meet the risks inherent in the business. The main objective of ICAAP exercise is to identify and measure the risks that are not fully captured by the minimum capital ratio prescribed under Pillar I; the risks that are not at all taken into account by the pillar I; and the factors external to the bank and to provide capital for such additional risks and to measure an appropriate level of internal capital as per the risk appetite. The bank has also put in place the stress testing policy to measure impact of adverse stress scenario on its CRAR. The bank reviews the ICAAP on quarterly basis. Bank has taken initiatives to migrate to advanced approaches for Capital Adequacy Computation, Bank has already appointed the consultant & system integrator vendor for moving to advanced approach.

General qualitative disclosure requirement

A committee of board of Directors regularly oversees the Bank's Risk Management policies/practices under various risks viz. credit, operational, market etc. The bank also has separate committees for each risk comprising of top executives of bank headed by Chairman and Managing Director/ Executive directors such as Asset liability Management committee, Credit policy Committee, Operational Risk committee. These committees meet at regular intervals throughout the year to assess and monitor the level of risk under various bank operations and initiate appropriate mitigation measures wherever necessary.

The Risk Management Department at central office level which is headed by General Manager; measures, control and manages risk within the limits set by the Board and enforces compliance with risk parameters set by various committees. The General Manager is assisted by Deputy General Manager and a team of Assistant General Managers, Chief Managers, Senior Managers and Managers.

At some identified zonal offices, Risk Managers are posted who act as an extended arm of the Risk Management Department of Central Office. Officers are also identified at some regional offices to work as risk managers.

The bank has in place various policies such as Credit Risk Management Policy, Credit Risk Mitigation and Collateral Management Policy, Stress testing policy, Market Discipline &Disclosure policy, Intra group transaction and exposure policy, Operational risk policy, ALM policy and Investment and Market risk management Policy.

Besides these, the Loan Policy prescribing broad parameters governing loan functions, guidelines on appraisal and evaluation of credit proposals, lending powers of delegated authorities' exposure norms, prudential limits and measures, monitoring and controlling the credit portfolio is also in place.

The Credit Monitoring Department headed by General Manager monitors the loan portfolio, identify special mention accounts and take corrective measures. Loan review mechanism is also carried out by the department apart from processing and monitoring of accounts under CDR mechanism.

The bank has introduced rating models for various segments of borrowers including retail lending schemes which measures the risk associated with counterparties and helps in credit and pricing decisions. In case of large borrowers, credit risk assessment models evaluate financial risk, Industry risk, Management risk and business risk of the counter party and each of these risks are scored separately then overall rating is accorded to the counter party. Facility rating module is also available in the rating tool. Where parental support is available the same is also factored in rating, if corporate guarantee is available to the borrower

Table DF-7
Market risk in trading book

Qualitative disclosures

The bank has well defined Investment and Market Risk Management Policy. This policy covers all important areas of market risk measurement.

Bank defines Market Risk as the risk of loss in on-balance sheet and off-balance sheet positions arising from movements in market process, in particular, changes in interest rates, exchange rates and equity and commodity prices.

The bank has adopted Standardized Duration Approach for measuring the capital requirements for market risk as prescribed by RBI.

Policies for management of Market Risk:

The bank has put in place board approved Investment and Market Risk Management Policy for effective management of Market Risk in the bank. Other policy which also deal with Market Risk Management are Asset Liability Management Policy.

The policies set various prudential exposure limits and risk limits for ensuring that the operations are in line with bank's expectations of return through proper Market Risk Management and Asset Liability Management.

Asset-Liability Management

The ALM Policy is the framework of the ALM process. Bank's balance sheet has mixed exposure to different levels of financial risk. The goal of bank is to maximize its profitability, but do so in a manner that does not expose the bank to excessive levels of risk which will ultimately affect the profitability. The Policy defines the limits for key measure of risk limits that have been established to specifically accommodate a bank's unique balance complexion, strategic direction, and appetite for risk.

Liquidity Risk

Liquidity Risk is managed through GAP analysis, based on residual maturity/behavior pattern of assets and liabilities. Banks has also put in place mechanism of short term dynamic liquidity management and contingency funding plan. Prudential limits are prescribed for different residual maturity time buckets for efficient Asset Liability Management. Liquidity profile of the bank is also evaluated through various liquidity ratios.

Interest rate risk

Interest rate risk is managed through Gap analysis of rate sensitive assets and liabilities and is monitored through prudential limits. Bank also estimates risk periodically against adverse movements in interest rate for assessing the impact on Net Interest Income and economic Value of Equity.

Table DF-8
Operational risk

Qualitative disclosures

Operational Risk is the risk of losses resulting from inadequate or failed internal processes, people and systems or from external events. Operational Risk includes legal risk but excludes strategic and reputation risks. Operational Risk Management in the Bank is guided by a well defined Operational Risk Management Policy which is reviewed every year. The bank has initiated pro-active steps to equip itself to migrate to advanced approaches under Operational Risk and has started collation of data pertaining to Operational Risk loss events through Loss Data Management, Risk & control Self Assessment (RCSA), Key Risk Indicators (KRI) & Scenario Analysis. Bank is also a member of loss data consortium 'CORDEx' for external loss data base.

The Bank had already approached RBI for moving to The Standardized Approach and is now making efforts to move directly to Advance Measurement Approach.

The bank has provided capital for operational risk as per Basic Indicator Approach.

Accordingly the capital requirement for operational risk as on 30.09.2015 is Rs.12188mn.

Table DF-9
Interest rate risk in the banking book (IRRBB)

Qualitative Disclosure:

The interest rate risk is measured and monitored through two approaches:

1) Earning at risk (Traditional Gap Analysis)
   The impact of change in interest rates on net interest income is analyzed under this approach and calculated under yield curve approach. Under this approach a parallel shift of 1% is assumed both in assets and liabilities.

2) Economic Value of Equity:
   Modified duration of assets and liabilities is computed separately to arrive at modified duration of equity. A parallel shift in yield curve by 200 basis point is assumed for calculating the economic value of equity.
