- d. The aggregate amount of capital deficiencies in all subsidiaries which are not included in the regulatory scope of consolidation i.e. that are deducted: NIL
- e. The aggregate amounts (e.g. current book value) of the bank's total interests in insurance entities, which are risk-weighted: NIL
- f. Any restrictions or impediments on transfer of funds or regulatory capital within the banking group: NIL

Table DF-2: Capital Adequacy

Oualitative disclosures

(a) A summary discussion of the bank's approach to assess the adequacy of its capital to support current and future activities:

The Bank carries out regular assessment of its capital requirement from time to time to maintain the Capital to Risk Weighted Assets Ratio (CRAR) at desired level. The capital plan is reviewed on annual basis to take care of business growth and CRAR.

The Bank has adopted standardized approach for credit risk, basic indicator approach for operational risk and standardized duration approach for market risk for computation of risk weight.

The Bank has put in place a well laid down Internal Capital Adequacy Assessment Process to enable the Bank to plan its capital requirements in relation to its business projections and to meet the risks inherent in the business. The main objective of ICAAP exercise is to identify and measure the risks that are not fully captured by the minimum capital ratio prescribed under Pillar I; the risks that are not at all taken into account by the pillar I; and the factors external to the Bank and to provide capital for such additional risks and to measure an appropriate level of internal capital as per the risk appetite. The Bank has also put in place the stress testing policy to measure impact of adverse stress scenario on its CRAR.

The Bank reviews the ICAAP on quarterly basis.

The Bank has taken initiatives to migrate to advanced approaches for Capital Adequacy Computation, and has implemented SAS solution for computation of risk weight under Advanced Approach.

Tid valleed Tipprouell.	
Quantitative disclosures (b) Capital requirements for credit risk:	
• Portfolios subject to standardized approach @9%	Rs. 12466.91 Crore
• Securitization exposures :	NIL
(c) Capital requirements for market risk:	
Standardized duration approach;	
- Interest rate risk	Rs. 387.21 Crore
- Foreign exchange risk (including gold)	Rs. 4.05 Crore
- Equity risk	Rs.262.55 Crore
(d) Capital requirements for operational risk:	
Basic Indicator Approach	Rs. 1539.23 Crore
(e) Common Equity Tier 1, Tier 1 and Total Capital	
ratios:	
• Common Equity Tier 1	12.11%
• Tier 1	12.11%
Total Capital ratio	14.12%

General qualitative disclosure requirement

A committee of Board of Directors regularly oversees the Bank's Risk Management policies/practices under various risks viz. credit, operational, market, etc. The Bank also has separate committees comprising of top executives of Bank, headed by Managing Director & CEO and Executive Directors, such as Asset Liability Management Committee, Credit Risk Management Committee and Operational Risk Management Committee. These committees meet at regular intervals to assess and monitor the level of risk under various operations and initiate appropriate mitigation measures wherever necessary.

The Risk Management Department at Central Office headed by the Chief Risk Officer measures controls and manages risk within the limits set by the Board and enforces compliance with risk parameters set by the committees. The Chief Risk Officer is assisted by a team of Deputy General Managers, Assistant General Managers, Chief Managers, Senior Managers and Managers.

Risk Managers are posted at all Zonal offices who act as extended arms of Risk Management Department of Central Office. Risk Managers have also been identified at Regional Offices.

The Bank has in place detailed policies such as Credit Risk Policy, Model Risk Policy, Credit Rating Policy, Credit Risk Mitigation and Collateral Management Policy, Enterprise Risk Management Policy, Operational Risk Management Policies, ALM Policy, Market Risk Management Policy, etc.

Besides these, the Loan Policy prescribe the parameters governing loan sourcing, guidelines on appraisal and evaluation of credit proposals, lending powers of delegated authorities, exposure norms and prudential limits.

Credit Monitoring Department headed by a General Manager monitors the loan portfolio, identifies Special Mention Accounts and takes corrective measures. Loan Review Mechanism is implemented by the department apart from managing of accounts under CDR mechanism.

Dynamic Review of all account with exposure above Rs 300 Crore is also under taken at specified frequency. Further, Dynamic Review of accounts with exposure above Rs 25 crore is under taken as and when any trigger/event takes place. Credit monitoring policy prescribes the methodology for monitoring and supervising the credit portfolio.

The Bank has introduced rating models for different segments of borrowers including retail lending schemes which measure the risks associated with counterparties and helps in making lending and pricing decisions. In case of large borrowers, credit risk assessment models evaluate Financial risk, Industry risk, Management risk and Business risk of the counter party. Conduct of account is also factored in for arriving at an overall rating of the counter party. If parental support as corporate guarantee is available, it is also factored in. To assess the risk return trade off, RAROC is computed and used in decision making.

Table DF-3 Credit risk: General disclosures for all banks

Qualitative Disclosures

Credit risk

Impaired:

The Working Group to review the existing prudential guidelines on restructuring of advances by banks/financial institutions in its report dated 20.07.2012 observed that as per international accounting standards, accounts are generally treated as impaired on restructuring and recommended that similar practice should be followed in India. Ind AS 109 contains guidance on the recognition, derecognition, classification and measurement of financial instruments including impairment and hedge accounting

A Non-Performing Asset shall be a loan or an advance where-

- (i) Interest and/or instalment of principal remain overdue for a period of more than 90 days in respect of a Term Loan;
- (ii) The account remains out of order for 90 days
- (iii) The bill remains overdue for a period of more than 90 days in the case of Bills Purchased and Discounted
- (iv) In case of advances granted for Agricultural purposes
 - a) The instalment of principal or interest thereon remains overdue for two crop seasons for short duration crops
 - b) The instalment of principal or interest thereon remains overdue for one crop season for long duration crops
- (v) The amount of liquidity facility remains outstanding for more than 90 days, in respect of a securitization transaction undertaken in terms of guidelines on securitization dated February 1, 2006.
- (vi) in respect of derivative transactions, the overdue receivables representing positive mark to- market value of a derivative contract, if these remain unpaid for a period of 90 days from the specified due date for payment.

Out of Order:

An account should be treated as "Out of Order" if the outstanding balance remains continuously in excess of the sanctioned limit/drawing power, or in cases where the outstanding balance in the principal operating account is less than the sanctioned limit/drawing power, but there are no credits continuously for 90 days as on the date of balance sheet or credits are not enough to cover the interest debited in the account during the same period.

Overdue:

Any amount due to a bank under any credit facility is overdue if it is not paid on due date fixed by the bank.

Credit Risk Management Policy

The Bank has put in place a well-articulated Board approved Credit Risk Policy which is reviewed annually. The policy deals with the following areas:

- Credit risk- definition, Policy and strategy
- Risk identification & measurement,
- Risk grading and aggregation,
- Credit risk rating framework and reporting,
- Risk control and portfolio management,
- Mitigation techniques,
- Target markets and type of economic activity,
- Credit approval authority,
- Country and currency exposure,
- Maturity patterns, level of diversification,
- Cyclical aspect of the economy,
- Credit risk in off balance sheet exposure,
- Credit risk monitoring procedures
- Managing of credit risk in interbank exposure,
- Country risk and other operational matters

Credit risk: disclosures for portfolios subject to the standardized approach

Qualitative Disclosures

- a. The Bank has adopted Standardized approach for computation of capital charge for Credit risk as per RBI guidelines. These guidelines envisage different risk weights for different asset classes, which have been duly applied.
- b. The Bank has recognized the ratings issued by six External Credit Rating Agencies identified by RBI viz., CRISIL Ratings Ltd., CARE Rating, ICRA Ltd., India Ratings and Research Pvt. ltd, ACUITE (SMERA) Ratings, and INFOMERICS to rate the exposures of borrowers.
- c. These agencies rate all fund and non-fund based exposures. The ratings awarded by these agencies to the Bank's borrowers are adopted for assigning risk-weights.
- **d.** In case of Bank's investment in particular issues of Corporates, the issue specific rating of the rating agency is reckoned to assign the risk weight.

Table DF-5 Credit risk mitigation: disclosures for standardized approaches

Qualitative Disclosures

- Policies and processes for collateral valuation and management; Bank has a well-defined credit risk mitigation and collateral management policy. The main types of collaterals accepted by the Bank are cash and near cash securities, land and building, plant, machinery and stocks etc.
- A description of the main types of collateral taken by the Bank; Bank accepts personal guarantees, corporate guarantees and guarantees issued by sovereigns and banks. Collaterals are valued at fair market value and at regular intervals as per the policy guidelines.

RBI guidelines recognize various types of financial collaterals for the purpose of credit risk mitigation. The guidelines further provide recognition of guarantees as one of the credit risk mitigants. Bank has put in place suitable policy measures to capture these elements.

Table DF-7 Market risk in trading book

Qualitative disclosures

The Bank has a well-defined Market Risk Management Policy. This policy covers all important areas of market risk measurement.

Bank defines Market Risk as the risk of loss in on-balance sheet and off-balance sheet positions arising from movements in market rates, in particular, changes in interest rates, exchange rates and equity and commodity prices.

The Bank has adopted Standardized Duration Approach for measuring the capital requirements for market risk as prescribed by RBI.

Policies for management of Market Risk:

The Bank has put in place Board approved Market Risk Management Policy for effective management of Market Risk in the Bank. Other policies which also deal with Market Risk Management are Integrated Treasury Policy and Asset Liability Management Policy.

The policies set various prudential exposure limits and risk limits for ensuring that the operations are in line with Bank's expectations of return through proper Market Risk Management and Asset Liability Management.

Asset-Liability Management

The ALM Policy is framed as per the extant regulatory guidelines and is approved by the Board of Directors. The Policy is reviewed periodically to incorporate changes as required by regulatory stipulation or to re-align with changes in the economic landscape. The ALCO of the Bank approves and reviews strategies and provides guidance for management of liquidity risk and interest rate risk within the framework laid out in the ALM Policy. The Risk Committee of the Board has an oversight on the ALCO.

Liquidity Risk

Liquidity Risk is measured using flow approach & stock approach. Flow approach involves comprehensive tracking of cash flow mismatches. Stock approach involves measurement of critical ratios in respect of liquidity risk.

Further, Bank has also adopted the Basel III framework on liquidity standards and has put in place requisite systems and processes to enable monitoring and reporting of the Liquidity Coverage Ratio (LCR) and Net Stable Funding Ration (NSFR), as per the extant regulations. The Bank has a Board approved liquidity stress framework guided by the regulatory instructions. Bank has also set up a formal contingency funding plan (CFP) that sets out the strategies for addressing liquidity shortfalls in emergency situations.

Interest rate risk

Interest rate risk is the risk where changes in market interest rates affect a bank's financial position. Changes in interest rates impact a bank's earnings through changes in its Net Interest Income (NII). Changes in interest rates also impact a bank's Market Value of Equity (MVE) through changes in the economic value of its rate sensitive assets, liabilities and off-balance sheet positions. The interest rate risk, when viewed from these two perspectives, is known as 'earnings perspective' and 'economic value perspective', respectively.

The Bank measures and controls IRRBB using both Earnings Perspective (Traditional Gap Analysis) and Economic Value Perspective (Duration Gap Analysis). These methods involve bucketing of rate sensitive assets and rate sensitive liabilities including off-balance sheet items, based on the maturity/re-pricing dates.

Quantitative disclosures

Capital Requirement for Market Risk	Capital Charge (Rs. in Crore)
Interest Rate Risk	387.21
Equity Position Risk	262.55
Foreign Exchange Risk	4.05
TOTAL	653.81

Table DF-8 Operational risk

Qualitative disclosures

Operational Risk is the risk of losses resulting from inadequate or failed internal processes, people and systems or from external events. Operational Risk includes legal risk but excludes strategic and reputation risks. Operational Risk Management in the Bank is guided by a well-defined Operational Risk Management Policy which is reviewed every year. The Bank has initiated pro-active steps to equip itself to migrate to advanced approaches under Operational Risk and has started collation of data pertaining to loss events including near miss event through Loss Data Management, Risk & Control Self-Assessment (RCSA), Key Risk Indicators (KRI). Bank is also a member of loss data consortium "PSB Alliance" (erstwhile CORDEx) from where external loss data is obtained.

The Bank has put in place SAS system for moving to Advanced Measurement Approach.

The Bank has provided capital for operational risk as per Basic Indicator Approach. Accordingly the capital requirement for operational risk as on 31.03.2023 is Rs. 1539.23 Crore.

Table DF-9 Interest Rate Risk in the Banking Book (IRRBB)

Qualitative Disclosure:

The interest rate risk is measured and monitored through two approaches:

- 1) Earning at risk (Traditional Gap Analysis)
 The impact of change in interest rates on net interest income is analyzed under this approach and calculated under yield curve approach. Under this approach a parallel shift of 1% is assumed both in assets and liabilities.
- 2) Economic Value of Equity:

 Modified duration of assets and liabilities is computed separately to arrive at modified duration of equity. A parallel shift in yield curve by 200 basis point is assumed for calculating the economic value of equity.

Quantitative Disclosure

Parameter of Change	Rs. in Crore
1.Impact on Earnings at 100 bps increase in interest rate across assets and liability	356.69
2.Market value of Equity: 200 bps change	1388.10

Table DF-10

General Disclosure for Exposures Related to Counterparty Credit Risk

Qualitative Disclosures	(a)	The Bank assigns credit limits for counterparty exposure on the basis of capital adequacy, asset quality, earnings, liquidity and management quality. The Bank has a well-defined market risk management policy. The Bank deals in various derivative products and interest Rate Swaps. The Bank used derivative products for hedging its own balance sheet items as well as for trading purposes.

Table DF-16: Equities – Disclosure for Banking Book Positions As on 31.03.2023

Qualitative Disclosures

- The general qualitative disclosure requirement (Para 2.1 of this annex) with respect to equity risk, including:
- Investments in equity of subsidiaries and joint ventures (a Joint Venture would be one in which the bank, along with its subsidiaries, holds more than 25 percent of the equity) are required to classified under HTM category in accordance with the RBI guidelines. These are held with a strategic objective to maintain strategic relationships or for strategic business purposes.
- differentiation between holdings on which capital gains are expected and those taken under other objectives including for relationship and strategic reasons; and
- · In accordance with the RBI guidelines on investment classification and valuation. Investments are classified on the date of purchase into "Held for Trading" (HFT), "Available for Sale" (AFS) and "Held to Maturity" (HTM) categories (hereinafter called "categories"). Investments which the Bank intends to hold till maturity are classified as HTM securities. In accordance with the RBI guidelines, equity investments held under the HTM category are classified as banking book for capital adequacy purpose.
- Discussion of important policies covering the valuation and accounting of equity holdings in the banking book. This includes the accounting techniques and valuation methodologies used, including key assumptions and practices affecting valuation as well as significant changes in these practices.

Investments classified under HTM category are carried at their acquisition cost and not marked to market. Any diminution, other than temporary, in the value of equity investments is provided for. Any loss on sale of investments in HTM category is recognised in the Statement of Profit and Loss. Any gain from sale of investments under HTM category is recognised in the Statement of Profit and Loss and is appropriated, net of taxes and statutory reserve, to "Capital Reserve" in accordance with the RBI Guidelines.
